HTS

Historical Thermal Steel Series

Released to the public in late October of 2015, our new HTS steel frame series is the innovative successor to the revolutionary OS2 frame series. HTS maintains all of the durability and design flexibility capabilities of the OS2 series but with a much narrower sight-line.

We know you're busy, so above is a link to a printable data sheet for your review.

How will TBS benefit you? Well...

Glazed Once, Right

Do you have painful memories of waiting for glass deliveries or having received glass that didn't fit? Or, how about inadequate onsite caulking resulting in water damage? From aesthetics to waterproofing, glazing is crucial which is why we give you the option to have professionals at the factory glaze it for you.

Budgets Realized

For every action there is an equal and opposite reaction – sound familiar? Well, if units are glazed poorly and cause water damage or your shipment is delivered late, the reaction is in your wallet. From start to finish, we adjust to the needs of your project to stay within budget.

New Developments and News

NEW CATALOG

It's been a long wait but you'll be glad to know **IT'S HERE!** COMEP's Catalog has been completely transformed and now includes new products and much more! Use the link below to download it today!
